

The source for all your **drawn-wire** needs.

WHO WE ARE

The Leggett & Platt Wire Group brings together our Drawn Wire, and International Wire groups to supply high-quality wire and wire products to customers across the globe.

This wire comes from steel we make at our own steel mill. The steel is drawn into rods that are then formed into wire used by our Wire Group to supply customers with wire for a variety of applications, including retail displays, automotive seating, and bedsprings.

The Wire Group is part of Leggett & Platt, a diversified manufacturer of engineered components found in most homes, offices, and automobiles, dating back to 1883.

GLOBAL NETWORK

Using L&P's global network of offices and production facilities, Leggett & Platt Wire International is able to source and supply most grades of wire and wire products for a multitude of applications, servicing a diverse range of industries. We work directly with mills both abroad and domestic. Our focus is fine-diameter wire for specialized applications.

LPWI is a wholly owned subsidiary of Leggett & Platt, Inc., a diversified manufacturer that conceives, designs, and produces a broad variety of engineered components and products for customers worldwide.

QUALITY

- Our continuous quality-improvement system ensures reliability, performance, and consistency of our products.
- That means less downtime and waste and greater cost savings for your operation.

EXPERTISE

- Our process starts with our customers. Wire Group's highly experienced metallurgists and technicians work with you and our suppliers to develop the right wire for your end use.
- That means the right product for your application.

RELIABILITY

- We have stringent requirements for both internal and external suppliers of steel rods for maximum reliability and consistency.
- That means a consistent and reliable product for your application.

COMPETITIVE ADVANTAGE

- We continually improve our strategic approach, namely through attention to Six Sigma, Lean, and Continuous Improvement processes.
- That means maximum efficiency and a technological edge to succeed in today's competitive environment.

OUR CAPABILITIES

Our various manufacturing capabilities and materials allow us to produce the best solution for your needs.
